**CITY COUNCIL CONSENT CALENDAR**

Addressing the City Council regarding the Consent Calendar:

Scott Pelka – Stated his concerns regarding Item No. CC 6 and the clause regarding consultants and the work they may be performing for the City.

Vice Mayor Smith clarified that if a Council Member is receiving financial gain from someone, then they cannot have a contract with the City. He requested that the City Attorney briefly explain the filing requirements of the Form 700.

The City Attorney stated that every two years, cities are required to update their Conflict of Interest Code. The provision Mr. Pelka is referring to is common language in Conflict of Interest Codes with all cities. The consultant clause is very limited to someone who has a very limited scope of work. If there were any financial interests between that entity and a Council Member, the City could not approve a contract with that person. If it was not involving a contract, then any conflict or financial interest would be picked up on the Council Member's Form 700. All areas are covered and this helps to avoid having people come in and file unnecessary paperwork for two weeks worth of work and then their job is completed.

Vice Mayor Smith clarified that this action is mandated by the State; by the Fair Political Practices Commission.

Michael Rives – discussed Item No. CC 6 and the filing requirements of the different levels of employees; discussed Item No. CC 5 regarding the Vehicles for Hire Ordinance.

On a motion by Council Member Mann and seconded by Council Member Crist, the City Council approved the Council Consent Calendar by the following vote: 4-0-0-1; AYES: Crist, Johnson, Mann, Smith; NOES: None; ABSTAIN: None; ABSENT: Parris

OEC - Lancaster, LLC (Ecolution) representatives met with city staff and expressed their interest in developing and operating a Materials Recovery and Conversion Facility (MRF) in Lancaster. Ecolution is an advanced solid waste separation and renewable energy development company that utilizes state of the art technologies capable of converting unrecyclable solid waste into useful products, such as green fuels and renewable energy, in an environmentally beneficial way. The system Ecolution utilizes also recovers up to 85% of recycled materials from waste streams, which would be approximately 49% more efficient than what currently exists in Lancaster.

Ecolution is seeking to enter into a partnership agreement with the City to develop its Materials Recovery Facility (MRF) in Lancaster. Through a separate Exclusive Negotiating Agreement (ENA), the City would work with Ecolution to locate a site that could accommodate its facility and would assist Ecolution through the development approval process. Through this partnership agreement, the City would commit to direct its local waste stream to Ecolution's proposed MRF facility for a twenty (20) year period subject to existing contractual obligations. In addition, the City would work jointly with Ecolution to contact regional waste haulers to encourage them to divert their waste to Ecolution's MRF facility.
