

STAFF REPORT
City of Lancaster

NB 2
04/10/07
RSL

Date: April 10, 2007

To: Mayor Hearn and City Council Members

From: James R. Williams, Public Works Director

Subject: **Pavement Condition Report**

Recommendation:

Receive and file this report addressing the condition of paved streets and roads in Lancaster

Background:

The City of Lancaster has conducted a study of the roadway system to evaluate surface roughness, surface conditions, and structural capacity. These criteria are used to determine condition assessments and identify surfacing or reconstruction methods best suited for each street segment. This study has determined the current pavement condition of all City of Lancaster streets, has analyzed various maintenance strategies, and makes recommendations with regards to funding and selection of street work. This information is provided in an effort to keep the City Council informed of the current state of this valuable asset as well as to provide insight into the development of the Capital Improvement Project Program.
