

INTERNAL MEMO

To: Engineering Division
From: Ray Hunt, Senior Civil Engineer
Date: August 16, 2007
Subject: Detectable Warning System – Truncated Domes

The Engineering Division shall accept Armorcast Detectable Warning Panels and Tiles as an approved equal to the Armor-Tile detectable warning systems called out in the City's Specifications for curb ramp construction.

This does not relieve the Contractor of their requirement to submit product specifications for approval by the Engineering Division.
