

FLEW DAY EVENT!

OCTOBER 6, 2007

Come join us at the FLEW Day EVENT! FLEW, Flight and Learning and Engineering with Wings, Day is an educational event geared towards kids. The goal of the event is to expose children to engineering in a fun, outdoor setting. Engineers from Lockheed Martin will be at the Prime Desert Woodland Preserve to explain how certain aspects of engineering relates to Birds and Flight.

There will be demonstrations, billboards, birds of prey, and plenty of time to interact with engineers. The Prime Desert Woodland Preserve provides an ideal location to learn about birds and engineering.

FLEW program is sponsored by SETLA
