 RB Case Number: 6B1900570T
 Local Agency: LOS ANGELES COUNTY
 File Location: Not reported
 Local Case Number: Not reported
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Gasoline
 Site History: The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the Lahontan Regional Water Quality Control Board. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the Lahontan Regional Water Quality Control Board should be consulted.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 92979
Site Name: ARCO #82560
Violation Date: 07-10-2017
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16,
Section(s) 2665
Violation Description: Failure to comply with one or more of the following: Failure to
install or maintain a liquid-tight spill bucket. Have a minimum
capacity of five gallons. Have a functional drain valve or other
method for the removal of liquid from the spill bucket/spill
container. Be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 08/09/2018.
Violation Division: Los Angeles County Department of Public Works
Violation Program: UST
Violation Source: CERS

Site ID: 92979
Site Name: ARCO #82560
Violation Date: 05-04-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter
6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or
disposal within 180 days (or 270 days if waste is transported over 200
miles) for a generator who generates less than 1000 kilogram per month
if all of the following conditions are met: (1) The quantity of

S110070354

Violation Notes: hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Returned to compliance on 06/04/2018. OBSERVATION: 4 x 55-gallon drums of unknown liquid that appears to be waste water and fuel located in the outside storage area West of the building were observed with incorrect, incomplete or no labels, and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of all drums on-site containing waste liquid in outside storage area and submit a copy of the manifest/receipt to this division.

Violation Date: 05-04-2018
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 08/09/2018. OBSERVATION: Uniform hazardous waste manifests/disposal receipts for the previous 3 years were not available for review at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests/consolidated disposal receipts for the previous 3 years and submit copies to this division.

Violation Date: 05-04-2018
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes: Returned to compliance on 06/04/2018. OBSERVATION: 1 x 55-gallon empty drum labeled as flammable liquid was observed in the outside storage area West of the building without labels and the drum was severely rusted with holes in the side. CORRECTIVE ACTION: Submit photos/documentation to this division demonstrating that the empty containers listed above have been properly managed by recycling the drum.

Potential Media Affect: Aquifer used for drinking water supply, Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern: Gasoline
Site History: The Water Board closed this site in 1996 (see Water Board letter dated 8/2/1996). However, the County evidently keep the case open in their files and transferred this case to the Water Board in conjunction with the transfer of many of their open cases to the Water Board. I have reviewed the files, and determined there is no justification to reopen the case. This Water Board case was closed in

Eval General Type: Other/Unknown
Eval Date: 12-13-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Facility still had an unlabeled drum full of waste stored at the North East corner of the parking lot. Provided manager Louis Almeida with hazardous waste labels, Mr. Almeida labeled the drum during the follow-up inspection. Instructed facility to dispose of drum immediately as Mr. Almeida stated that the drum had been there since the new owners took over in May of 2017.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 01/13/2017. OBSERVATION: A business plan has not been received by the CUPA. CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 416647
Site Name: THE CAR SHOP
Violation Date: 02-07-2019
Citation: HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description: Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.
Violation Notes: Returned to compliance on 06/03/2019. OBSERVATION: Owner failed to maintain copies of the previous 3 years of consolidated manifests for used oil, waste antifreeze and drained used oil filters. Observed one consolidated manifest for a pickup of used oil from 1/28/19 but no other receipts available at time of inspection. CORRECTIVE ACTION: Ensure that all wastes transported on a consolidated manifest meet all consolidated manifest requirements, and maintain copies of consolidated manifests for three years.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/02/2019	Source: Environmental Protection Agency

Number of Days to Update: 70	Next Scheduled EDR Contact: 05/04/2020
	Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019	Source: Drug Enforcement Administration

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

HEALTH DISTRICT MASTER PLAN
43999 15TH ST W & 1600 WEST AVENUE J
LANCASTER, CA 93534

TARGET PROPERTY COORDINATES

Latitude (North):	34.685809 - 34° 41' 8.91"
Longitude (West):	118.162593 - 118° 9' 45.33"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	393502.5
UTM Y (Meters):	3838619.8
Elevation:	2357 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630747 LANCASTER WEST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

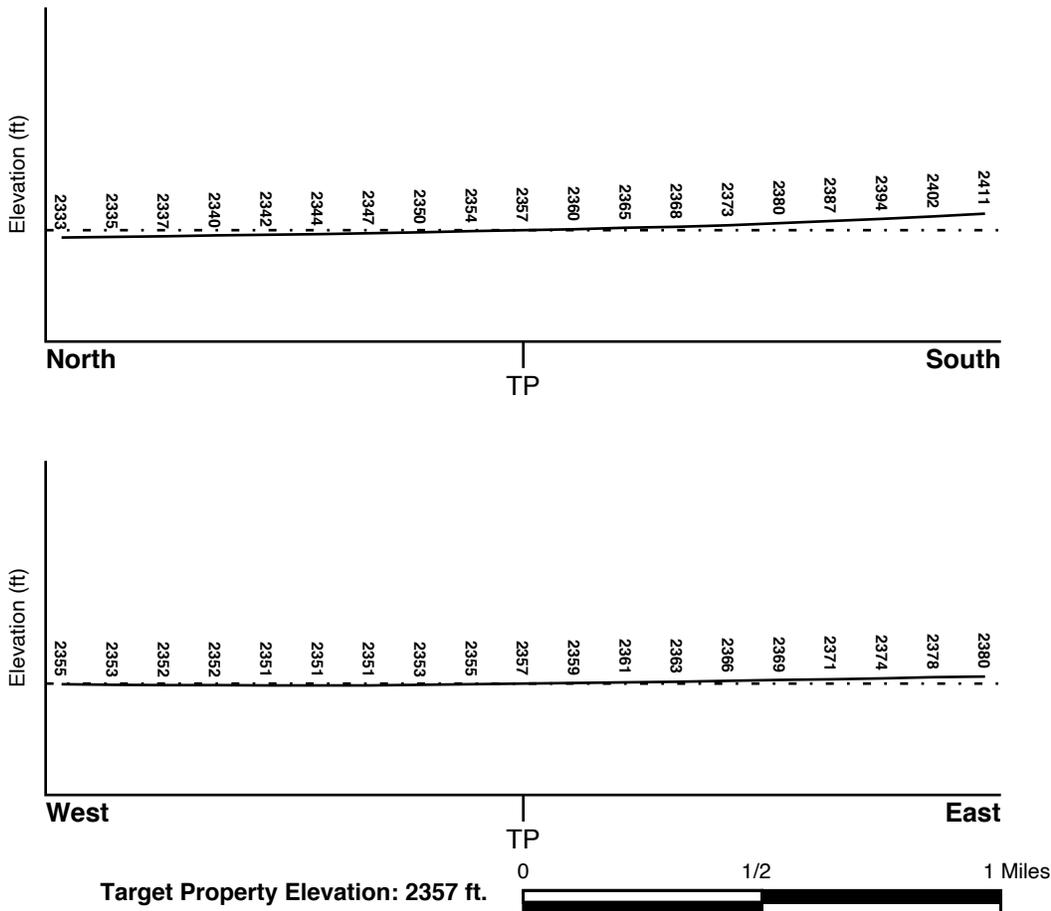

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C0420F	FEMA FIRM Flood data

06037C0410F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LANCASTER WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tray

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9.6 Min: 8.5
2	7 inches	31 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9.6 Min: 8.5
3	31 inches	70 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9.6 Min: 8.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Sunrise

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4
2	18 inches	31 inches	loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4
3	31 inches	48 inches	cemented	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4
4	48 inches	64 inches	stratified gravelly sandy loam to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: Hesperia

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

1	0 inches	3 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	3 inches	53 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
3	53 inches	77 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: Cajon

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	9 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

Soil Map ID: 5

Soil Component Name: Sunrise

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4
2	5 inches	20 inches	loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4
3	20 inches	29 inches	cemented	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4
4	29 inches	59 inches	stratified gravelly sandy loam to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Project No. 11637.001

Meridian Consultants, LLC
910 Hampshire Road, Suite V
Westlake Village, California 91361

Attention: Mr. Tony Locacciato, AICP, Partner

**Subject: Phase I Environmental Site Assessment (ESA)
Lancaster Health District Vacant Parcels
Lancaster, Los Angeles County, California**

Leighton Consulting, Inc. (Leighton) is pleased to present this Phase I Environmental Site Assessment (ESA) for three vacant portions of the Lancaster Health District located northeast of the intersection of West Avenue J-8 and 20th Street West, southwest of the intersection of West Avenue J-8 and 15th Street West, and southeast of the intersection of West Avenue J-2 and 15th Street West in Lancaster, Los Angeles County, California (site).

Preparers of this report meet the definition of Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312, and the ASTM International (ASTM) Standard E 1527-13. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting in northern Los Angeles County, California. Leighton has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

If you have questions regarding this report, please do not hesitate to contact us at (866) LEIGHTON, directly at the phone extension and e-mail address listed below. We appreciate the opportunity to be of service to Meridian Consultants, LLC.

Respectfully submitted,

LEIGHTON CONSULTING, INC.

1.0 INTRODUCTION

1.1 Authorization

Leighton Consulting, Inc. (Leighton) performed a Phase I Environmental Site Assessment (ESA) at the three vacant portions of the Lancaster Health District located northeast of the intersection of West Avenue J-8 and 20th Street West, southwest of the intersection of West Avenue J-8 and 15th Street West, and southeast of the intersection of West Avenue J-2 and 15th Street West in Lancaster, Los Angeles County, California (the site) in accordance with the authorization of Meridian Consultants, LLC (Meridian). Figure 1 is a location map for the site.

1.2 Purpose

The purpose of the Phase I ESA was to identify, to the extent feasible and pursuant to the processes prescribed in ASTM International (ASTM) E1527-13, recognized environmental conditions (RECs), historical RECs (HRECs), or controlled RECs (CRECs) in connection with the site.

RECs are defined, according to ASTM E1527-13 as *“the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not RECs.”*

HRECs are defined, according to ASTM E1527-13 as *“a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.”*

CRECs are defined, according to ASTM E1527-13 as *“a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.”* (ASTM E1527-13, 2013).

1.3 Scope of Work

The scope of work was performed in accordance with Leighton's April 6, 2016 proposal, authorized on May 4, 2017, and included the following tasks:

- A reconnaissance-level visit of the site for evidence of the release(s) of hazardous materials and petroleum products and to assess the potential for onsite releases of hazardous materials and petroleum products;
- Records review (including review of previous environmental reports, selected governmental databases, and historical review);
- Interviews; and
- Preparation of this report presenting our findings.

1.4 Significant Assumptions

Leighton assumes that the purpose of this Phase I ESA is to provide appropriate inquiry into the previous ownership and use of the site so that the Client may qualify for the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) landowner liability protections as defined in CERCLA, 42 USC §9601(35)(B). Leighton also assumes that the information provided by the Client and its agents, regulatory database provider, and regulatory agencies is true and reliable.

1.5 Limitations and Exceptions

Leighton performed the Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of the site. Other than the non-scope items shown in Section 1.6 that were not applicable, there were no exceptions to, or deletions from, this practice.

Property specific activities performed by Leighton and information collected regarding these activities are summarized within this report. The findings of the Phase I ESA are presented in Section 7.0. Opinions, and conclusions drawn by Leighton, based on the information collected as part of the Phase I ESA, are presented in Sections 8.0 and 9.0, respectively. References are included as Appendix A. Photographs of the site taken during the site reconnaissance are presented in Appendix B. Interview forms are included as Appendix C. The

Environmental Data Resources, Inc. (EDR) Radius Map Report and Vapor Encroachment Screening Report are included as Appendix D. Historical documentation is provided in Appendix E.

This Phase I ESA was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions.

The observations and conclusions presented in this report are professional opinions based on the scope of activities, work schedule, and information obtained through the Phase I ESA described herein. Opinions presented herein apply to property conditions existing at the time of our study and cannot necessarily be taken to apply to property conditions or changes that we are not aware of or have not had the opportunity to evaluate. It must be recognized that conclusions drawn from these data are limited to the amount, type, distribution, and integrity of the information collected at the time of the investigation, the methods utilized to collect and evaluate the data, and that a full and complete determination of environmental risks cannot be made. Although Leighton has taken steps to obtain true copies of available information, we make no representation or warranty with respect to the accuracy or completeness of this information.

This practice does not address whether requirements in addition to all appropriate inquiry have been met in order to qualify for the landowner liability protections including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations, or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations. Users should also be aware that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered on the site that are not addressed in this practice and that may pose risks of civil and/or criminal sanctions for non-compliance.

1.6 Special Terms and Conditions

The scope of work for this Phase I ESA did not include testing of electrical equipment for the presence of polychlorinated biphenyls (PCBs) or collection of other environmental samples such as soil, groundwater, soil gas, building materials, paint, or other media; assessment of natural hazards such as naturally occurring asbestos, radon gas or methane gas; assessment of the potential

presence of radionuclides; or assessment of nonchemical hazards such as the potential for damage from earthquakes or floods, or the presence of endangered species or wildlife habitats. This Phase I ESA also did not include an extensive assessment of the environmental compliance status of the site or of businesses operating at the site.

1.7 User Reliance

This report is for the exclusive use of Meridian. Use of this report by any other party shall be at such party's sole risk.

1.8 Important Information about Geoenvironmental Reports

Meridian is referred to Appendix F regarding important information provided by Geoprofessional Business Association (GBA) on geoenvironmental studies and reports.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The site is comprised of three separate, vacant lots located northeast of the intersection of West Avenue J-8 and 20th Street West (for the purposes of this Phase I ESA, named “Lot 1”), southwest of the intersection of West Avenue J-8 and 15th Street West (named “Lot 2”), and southeast of the intersection of West Avenue J-2 and 15th Street West (named “Lot 3”) in Lancaster, Los Angeles County, California. The Los Angeles County Assessor’s office designates 43 separate Assessor Parcel Numbers (APNs) for the three vacant lots at the site, as follows:

Lot 1

3123-001-922
3123-004-024
3123-004-037
3123-004-038
3123-004-040

Lot 2

3123-002-031
3123-002-032
3123-002-034

Lot 3

3123-015-908
3123-015-907
3123-015-901
3123-015-900
3123-015-904
3123-015-903
3123-015-902
3123-015-905
3123-015-906
3123-014-915
3123-014-916
3123-014-904
3123-014-905
3123-014-908
3123-014-909
3123-014-910
3123-014-902
3123-014-900

Lot 3

3123-014-914
3123-014-913
3123-014-901
3123-014-911
3123-014-907
3123-014-906
3123-014-912
3123-014-903
3123-013-900
3123-013-901
3123-016-085
3123-016-904
3123-016-905
3123-016-004
3123-016-005
3123-012-015
3123-012-041

2.2 Site Vicinity General Characteristics

The site is generally flat and undeveloped and consists of exposed soil vegetated with weeds and grasses. However, Lot 2 has an eastern portion where fill soil has been graded approximately 6-7 feet higher in elevation than the adjoining portion of the lot, suggesting imported fill placement. Lots 1 and 3 are generally flat-lying as well.

2.3 Current Use of the Site

The site is currently vacant and vegetated with weeds and grasses.

2.4 Descriptions of Structures, Roads and Other Improvements on the Property

No structures were observed at the site. At Lot 3, a fire hydrant was observed and West Avenues J-2 and J-3 were paved at the northwestern portion to accommodate residential dwellings (Photos 18, 19, and 21, Appendix B). No other improvements were observed at the site.

2.5 Current Uses of Adjoining Properties

All three lots at the site are bounded by a variety of land use types including residential, commercial, and institutional land use. Particular features bounding the lots include a channelized waterway and the adjacent California State Route 14 bounding the southwestern side of Lot 1. Lot 2 is similarly bounded on its southwestern corner and is bounded by the channelized waterway on its south side, and Lots 1 and 3 are bounded on their respective east and west sides by the Antelope Valley Hospital campus.

3.0 USER PROVIDED INFORMATION

The user of this Phase I ESA is identified as Meridian Consultants, LLC. A User Questionnaire Form regarding the site was not completed as the date of this Phase I ESA, but will be provided at a later date in an addendum letter or email once it is received.

3.1 Title Records

Title records were not provided by Meridian for the site.

3.2 Environmental Liens or Activity and Use Limitations

Records for environmental liens and Activity and Use Limitations (AULs) were excluded from the scope of work for this Phase I ESA and agreed upon by Meridian.

3.3 Specialized Knowledge

Specialized knowledge was not provided by the User to Leighton through a User Questionnaire Form.

3.4 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information was not provided by the User to Leighton through a User Questionnaire Form.

3.5 Valuation Reduction for Environmental Issues

Information regarding valuation reduction for environmental issues was not provided by the User to Leighton through a User Questionnaire Form.

3.6 Owner, Property Manager, and Occupant Information

Owner information was not provided by the User to Leighton through a User Questionnaire Form.

3.7 Reason for Performing Phase I ESA

Information provided by Meridian indicated that this Phase I ESA is for inclusion in an Initial Study for future development at the site.

3.8 Other

Other information pertinent to the site was not provided to Leighton by the User.

4.0 RECORDS REVIEW

4.1 Physical Setting Source(s)

Leighton reviewed pertinent maps and readily available literature for information on the physiography and hydrogeology of the site. A summary of this information is presented in the following subsections.

4.1.1 Topography

The site is located in Township 7 North, Range 12 West of the San Bernardino Baseline and Meridian. Topographic map coverage of the site vicinity is provided by the California Geological Survey (CGS) Lancaster West 7.5-Minute Quadrangle (2010). The average elevation of the site is approximately 2,358 feet above mean sea level (amsl) at Lot 1, approximately 2,376 feet amsl at Lot 2, and approximately 2,365 feet amsl at Lot 3 (CGS, 2010).

4.1.2 Surface Water

Standing water was observed in a depression adjacent to the corner of West Avenue J-5 and 13th Street West in the south-central portion of Lot 3 (Photo 25, Appendix B). No other indications of surface water were observed.

4.1.3 Geology

The site is located in the Antelope Valley portion of the Mojave Desert Geomorphic Province of California. The Antelope Valley lies within a wedge-shaped part of the Mojave Desert bound by the San Andreas Fault to the southwest, the Garlock Fault to the northwest, and the Cottonwood-Rosamond Fault to the northeast. The majority of the site is mapped with Holocene-age to Late Pleistocene-age younger alluvial fan deposits at the surface, which consist of clay-rich silty fine sand. The southeastern portion of Lot 2 is also mapped with late Holocene wash deposits, which consist of fine- to medium-grained sand with some coarse sands, gravel, and silt (CGS, 2010).

4.1.4 Hydrogeology

The site is located within the Antelope Valley Groundwater Basin, consisting primarily of Pleistocene and Holocene age unconsolidated alluvial and lacustrine deposits of sand, silt, clay, and gravel in its water-bearing units (DWR, 2004). Based on our data review from a groundwater monitoring report for the former Unocal #4295 gas station located at 1324 West Avenue J (current Rite Aid location, approximately 190 feet north of Lot 3, Figure 2), groundwater was measured on May 7, 2012 at depths ranging from 60.95 to 61.65 feet below ground surface (bgs). Direction of groundwater flow was reported to the north-northwest (AECOM, 2011, 2012).

4.1.5 Oil and Gas Fields

Leighton reviewed the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR), Online Mapping System, on May 15, 2017. Active and/or abandoned oil and gas wells were not identified on the site or on adjacent properties. Additionally, the EDR Lightbox Oil & Gas Wells interactive system did not identify active and/or abandoned oil and gas wells on the site or on adjacent properties. A copy of the EDR Radius Map Report is presented in Appendix D.

4.2 **Standard Environmental Record Sources**

A search of selected government databases was conducted by Leighton using the EDR Radius Map Report, dated May 4, 2017. Details of the database search along with descriptions of each database researched are provided in the EDR Radius Map Report (Appendix D). The report meets the government records search requirements of ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The database listings were reviewed within the specified radii established by the ASTM E1527-13.

4.2.1 Site

The site was identified in the EDR Radius Map Report in the following databases. Only those databases with information pertinent to the Phase I ESA are presented below:

Address	Database(s) and Summary
LOT 3 City of Lancaster/Public Works 1300 West Avenue J2 Lancaster, CA 93534	<u>HAZNET</u> In 2006, 0.67 tons of asbestos-containing waste was disposed at a landfill.
LOT 3 City of Lancaster/Public Works 1305 West Avenue J3 Lancaster, CA 93534	<u>HAZNET</u> In 2006, 0.16 tons of asbestos-containing waste was disposed at a landfill.
LOT 3 City of Lancaster 1303-1321 West Avenue J2 Lancaster, CA 93534	<u>HAZNET</u> In 2007, 2.0 tons of asbestos-containing waste was disposed at a landfill or “surface impoundment that will be closed as landfill.”
LOT 3 City of Lancaster 1311-1335 West Avenue J3 Lancaster, CA 93534	<u>HAZNET</u> In 2007, 0.8 tons of asbestos-containing waste was disposed at a landfill or “surface impoundment that will be closed as landfill.”
LOT 3 City of Lancaster 1347 West Avenue J3 Lancaster, CA 93534	<u>HAZNET</u> In 2008, 0.4 tons of asbestos-containing waste was disposed at a landfill or “surface impoundment that will be closed as landfill.”
LOT 3 City of Lancaster 44259 Kingtree Avenue Lancaster, CA 93534	<u>HAZNET</u> In 2011, 12.0 tons of asbestos-containing waste was disposed at a landfill or “surface impoundment that will be closed as landfill.”
LOT 3 City of Lancaster 44245 Kingtree Avenue Lancaster, CA 93534	<u>HAZNET</u> In 2011, 12.0 tons of asbestos-containing waste was disposed at a landfill or “surface impoundment that will be closed as landfill.”

See the EDR Radius Map Report (Appendix D) for the list of acronyms and data sources.

It is our opinion that above-referenced asbestos-containing waste was derived from the demolition of buildings that previously existed on Lot 3 and accordingly, should not be considered an REC.

4.2.2 Offsite

Information in the EDR Radius Map Report and other sources was reviewed for facilities of potential environmental concern to the site. Only one database/source with information pertinent to this Phase I ESA was found:

- Located approximately 0.38 miles southeast of Lot 2 at 1326 Avenue K and named “Arco 361/C/O Ken Lanz”, the property is listed as an “Open – Remediation” LUST site with gasoline impact to groundwater from a leaking underground storage tank, as of September 8, 2014. Groundwater flow direction was determined to be north-northwest as of August 12, 2016 (Arcadis, 2016). Our review of records for the Arco LUST case suggests that it should not be considered a REC due to the distance of the former gas station to the site. In addition, none of the historical groundwater monitoring wells or soil vapor probe locations that were installed for the Arco property are proximal to the site. Lastly, groundwater beneath the site is present at a depth of approximately 60-61 feet below ground surface. At that depth, any volatile organic compounds (VOCs) possibly dissolved in groundwater would be unlikely to affect the site.

Other listings in the EDR Radius Map Report were reviewed and are not interpreted to represent an adverse effect to the site at the time of this report preparation based on one or more of the following:

- The nature of the database listing and not appearing in a database that reports unauthorized releases of hazardous substances,
- The nature of the operations at the site,
- Reported regulatory agency status (i.e. “Case Closed”),
- Reported nature of the case (soil contamination only),
- Location of the facility with respect to anticipated groundwater flow direction (south), and/or
- Distance of the facility to the site.

No unmapped listings were presented in the EDR Radius Map Report.

4.2.3 Vapor Encroachment

Leighton reviewed the Vapor Encroachment Screen (VES) produced using EDR’s Vapor Encroachment Worksheet application that gathers regulatory database information from the accompanying Radius Report and allows the user to integrate groundwater information, regional geology, and other information to evaluate the concern for potential vapor encroachment by

volatile organic compounds (VOCs) from onsite activities and from adjacent properties. The VES application was designed by EDR to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E2600-10), also referred to as the Tier 1 VES, as defined by ASTM E2600-10.

Using the VES application and based on our judgement, no offsite database listings with potential to negatively impact the site with VOCs were identified near the site; therefore, vapor encroachment is not considered a REC. A copy of the VES report has been included as Appendix D.

4.2.4 Regulatory Agency Contacts

Leighton requested records from the regulatory agencies listed below for the vacant lots located northeast of the intersection of West Avenue J-8 and 20th Street West (Lot 1), southwest of the intersection of West Avenue J-8 and 15th Street West (Lot 2), and southeast of the intersection of West Avenue J-2 and 15th Street West (named Lot 3) in Lancaster, and using the APNs associated with the lots listed in Section 2.1.

City of Lancaster, Building and Safety Division

On May 11, 2017, a file review request for building permits or records was made with the Building and Safety Division at the City of Lancaster via email. Leighton received an email response on May 15, 2017 indicating that no records for the site were found.

Los Angeles County Department of Public Works, Environmental Programs

On May 11, 2017, a file review request was forwarded to the Los Angeles County Department of Public Works, Environmental Programs department via facsimile. On May 15, 2017, Leighton received an email response stating that no records were found for the address and APNs provided.

Los Angeles County Public Health Investigations

On May 11, 2017, a file review request was forwarded to the Los Angeles County Public Health Investigations department via facsimile. As of the date of this report, responses have not been received by Leighton from this agency.

Los Angeles County Sanitation District

On May 11, 2017, a file review request was forwarded to the Los Angeles County Sanitation District via facsimile. On May 16, 2017, Leighton received an email stating that no records were found for the site.

California Department of Toxic Substances Control (DTSC)

On May 11, 2017, a file review request was forwarded to the Department of Toxic Substances Control (DTSC) Cypress Office and the DTSC Chatsworth Office via facsimile. On May 15, 2017, Leighton received a letter from the DTSC Cypress Office stating that no records were found for the site. As of the date of this report, a response has not been received by Leighton from the DTSC Chatsworth Office.

ENVIROSTOR

Additionally, Leighton reviewed records posted on the DTSC's Envirostor online database. Searches were conducted by reviewing a map of the site and vicinity. Records of hazardous waste sites or environmentally impaired properties were not found for the site and adjacent properties.

Lahontan Regional Water Quality Control Board

On June 6, 2017, a file review request was forwarded to the Lahontan Regional Water Quality Control Board (LRWQCB) via email. As of the date of this report, no responses have been received by Leighton from the LRWQCB.

California (State) Water Resources Control Board

Leighton reviewed the State Water Resources Control Board's (SWRCB) Geotracker online database. Searches were conducted by reviewing a map of the site. Records were not found for the site.

One record was listed for Silver Hanger Dry Cleaners, located approximately 490 feet east of Lot 1 at the site. The record details a leak of an unknown quantity of chlorinated VOCs on January 2, 1965. The cleanup status for the property is listed as "Completed – Case Closed" as of January 31, 2001.

Another record was listed for the former Unocal #4295 gas station, located at 1354 West Avenue J (at current Rite Aid location), approximately 190 feet north of Lot 3 at the site. A gasoline leak of unknown quantity was discovered on November 24, 1992, however, the cleanup status for the site is listed as "Completed – Case Closed" as of September 7, 2012.

In addition, a record also found in the EDR Radius Map Report is listed for the Former Arco #1917 property, located at 1326 West Avenue K, approximately 0.38 miles southeast of Lot 2 (see Section 4.2.2). The status of the Arco property is listed as an "Open – Remediation" LUST Cleanup Site with gasoline impact to groundwater from a leaking underground storage tank, as of September 8, 2014 (SWRCB, 2012).

Oil and Gas Pipelines

Leighton reviewed records posted on the National Pipeline Mapping System's (NPMS) Public Map Viewer on May 15, 2017. Searches were conducted by reviewing a map of the site and surrounding areas. No oil and gas pipelines were mapped on the site and surrounding properties (NPMS, 2017).

Mojave Desert Air Quality Management District (MDAQMD)

On June 7, 2017, a file review request was forwarded to the Mojave Desert Air Quality Management District (MDAQMD) via email. On June 7, 2017, Leighton received an email response from the MDAQMD office stating that no records were found for the site.

State of California Radon Survey

Radon is not regulated within the State of California. Nonetheless, the California Department of Public Health (CDPH) and the United States Environmental Protection Agency (US EPA) both recommend a threshold of 4 picocuries per liter (pCi/L) above which certain precautions be taken to mitigate radon buildup in structures.

The CDPH maintains a database of indoor radon levels that are sorted by zip code. According to the most recent update prepared in February 2016, 31 tests for radon were completed in the site zip code of 93534 and none of the tests exceeded 4pCi/L; therefore, there is a low potential for elevated levels of radon at the site (CDPH, 2016).

4.2.5 Other Reports

Leighton reviewed groundwater monitoring reports for the former Unocal #4295 gas station located 1354 West Avenue J property (at the current Rite Aid location, approximately 190 feet north of Lot 3), where a gasoline leak of unknown quantity was discovered on November 24, 1992 (SWRCB, 2015). The reports detail the results of groundwater sampling events completed on April 6, 2011 and May 7, 2012 at the property from previously installed groundwater monitoring wells, which included calculation of groundwater flow direction, depth to groundwater measurements, and analytical testing results presented in figures and tables. The report details two groundwater zones beneath the property; shallow and ephemeral “Zone A”, and a deeper and more extensive “Zone B”. Thicknesses and depths of the tops and bottoms of each zone were not provided in the reports. The information below was provided from measurements collected from Zone B only. The groundwater flow direction in the April 2011 event and previous events was calculated to the north-northwest, and the most recent depths to groundwater measured on May 7, 2012 in the wells at the property were between 60.95 and 61.65 feet bgs (AECOM, 2011, 2012).

Leighton also reviewed a groundwater monitoring and status report for the Arco Station No. 1917 property at 1326 West Avenue K, located approximately 0.38 miles southeast of the site. The report details liquid phase hydrocarbon removal activities from recovery wells, and the results

of a groundwater sampling event completed on August 12, 2016. A calculation of groundwater flow direction, depth to groundwater measurements, and analytical testing results were presented in figures and tables. The groundwater flow direction was calculated to the north-northwest, and the depth to groundwater was reported between 30.81 and 32.01 feet bgs (Arcadis, 2016).

4.3 Historical Use Information on the Property

Leighton reviewed selected historical information on the site. These references were reviewed for evidence of activities, which would suggest the presence of RECs at the site and to evaluate the potential for the site to be impacted by offsite sources of contamination. The following paragraphs are a chronological summary of the review for Lots 1, 2, and 3 of the site.

4.3.1 Aerial Photographs

Lot 1

Historical aerial photographs were reviewed for information regarding past uses. Aerial photographs dated 1928, 1940, 1948, 1953, 1969, 1974, 1979, 1989, 1994, 2002, 2005, 2009, 2010, and 2012, provided by EDR, were reviewed. Copies of these photographs are included in Appendix E.

In the **1928, 1940 and 1948** aerial photographs, the majority of Lot 1 appears to be vacant and undeveloped, with only the central portion of the lot cleared for agricultural land use. On the north side of Lot 1 is the future trend of West Avenue J, and to the west of the lot is the trend of 20th Street West. West Avenue J and 20th Street West appear to be paved in the **1948** aerial photograph. Agricultural land use is observed to the north and southeast of the site in **1928** and **1940**, and additionally to the east of the site in **1948**. Small structures likely associated with land use observed on Lot 1 and at properties adjacent to Lot 1 are also present.

In the **1953** aerial photograph, few structures have been erected to the north of Lot 1 on adjacent properties.

In the **1969** aerial photograph, land use at Lot 1 no longer appears to be agricultural. West Avenue J-8 has been paved, bounding Lot 1 on its south side, and significant residential development has occurred to the north of

the lot. Two water tanks have appeared to the east of Lot 1 near 15th Street West. Development of portions of the current Antelope Valley Hospital is also observed in the photograph.

In the **1974** aerial photograph, Lot 1 appears to be completely unused, and the surrounding properties have undergone significant changes. A large warehouse building has been constructed to the northwest at West Avenue J, a portion of The Springs Apartments has been built to the southeast of Lot 1, a channelized waterway adjacent to California State Route 14 bounds the southwest side of Lot 1 has been constructed, and possible commercial buildings have been built north of West Avenue J. Additional construction at Antelope Valley Hospital is also observed.

In the **1979** aerial photograph, additional construction has been completed at Antelope Valley Hospital to the east of Lot 1. No other significant changes were observed.

In the **1989** aerial photograph, additional construction has been completed at Antelope Valley Hospital to the east and at The Springs Apartments to the southeast of Lot 1. No other significant changes were observed.

In the **1994** aerial photograph, additional construction has been completed at Antelope Valley Hospital to the east of Lot 1. No other significant changes were observed.

In the **2002 and 2005** aerial photographs, additional construction has been completed south of Antelope Valley Hospital to the east, the Antelope Valley Hospital Outpatient Surgery Center has been built to the north, the future building for The Home Depot has been constructed to the west, and Extra Storage Space has been built south of Lot 1. No other significant changes were observed.

In the **2009, 2010, and 2012** aerial photographs, Desert Sands Charter High School has been built south of The Home Depot, west of Lot 1. No other significant changes were observed.

Lot 2

Historical aerial photographs were reviewed for information regarding past uses. Aerial photographs dated 1928, 1940, 1948, 1953, 1969, 1970, 1974, 1979, 1983, 1989, 1994, 2002, 2005, 2009, 2010, and 2012, provided by

EDR, were reviewed. Copies of these photographs are included in Appendix E.

In the **1928, 1940, 1948, and 1953** aerial photographs, the majority of Lot 2 is agricultural land use. Similar land use extends off of Lot 2 to the east and south. The remaining properties surrounding Lot 2 are vacant and undeveloped.

In the **1969** aerial photograph, Lot 2 appears to be vacant along with the property to the south. Residential development has occurred to the southeast of Lot 2, and West Avenue J-8 and 15th Street West have been paved and bound Lot 2 on its north and east sides. The properties along the south and west boundaries of Lot 2 remain vacant and undeveloped.

In the **1970** aerial photograph, no significant changes to Lot 2 are observable. Construction of California State Route 14 and the adjacent channelized waterway is in progress.

In the **1974** aerial photograph, a significant portion of the photograph is missing. A branch of the channelized waterway that bounds the southern side of Lot 2 has been constructed, and a portion of The Springs Apartments has been built north of West Avenue J-8. No other significant changes to Lot 2 are observable.

In the **1983** aerial photograph, the majority of Lot 2 appears to have been disked but some vegetation has returned. The Arroyo Plaza shopping center and High Desert Medical Group complex and adjacent shopping center have been constructed to the northeast and south of Lot 2, respectively.

In the **1989** aerial photograph, additional building construction has been completed at The Springs Apartments to the north of Lot 2, and Sunrise Lancaster Apartments have been constructed east of Lot 2. An area of vegetation has been cleared on the eastern portion of Lot 2 near 15th Street West (Photo 12, Appendix B).

In the **1994** aerial photograph, the eastern limb of Lot 2 has been cleared of vegetation. No other significant changes were observed.

In the **2002** aerial photograph, a soil pad has been added to the eastern limb of Lot 2, raising the grade above the western portion of Lot 2. Soil

piles were noted at the western toe of the soil pad in the central portion of Lot 2, and observed during our site reconnaissance. Aurora Village Apartments has been constructed to the east of Lot 2 near 15th Street West.

In the **2005** aerial photograph, Extra Space Storage has been constructed to the west of Lot 2 at West Avenue J-8, and SchoolsFirst Federal Credit Union is under construction to the southeast of Lot 2 at 15th Street West. No other significant changes were observed.

In the **2009** aerial photograph, the AV Kidney Institute has been constructed to the northeast of Lot 2 at 15th Street West. No other significant changes were observed.

In the **2010** and **2012** aerial photographs, Lot 2 and the surrounding properties are representative of current conditions. No significant changes were observed.

Lot 3

Historical aerial photographs were reviewed for information regarding past uses. Aerial photographs dated 1928, 1940, 1948, 1953, 1979, 1981, 1989, 1994, 2002, 2005, 2009, 2010, and 2012, provided by EDR, were reviewed. Copies of these photographs are included in Appendix E.

In the **1928, 1940, 1948, and 1953** aerial photographs, the majority of Lot 3 is agricultural land use with few likely associated structures. Similar land use is observed to the east, southeast, and at Lot 2 to the southwest. West Avenue J is also observed. The remaining properties surrounding Lot 2 are vacant and undeveloped. In the **1940, 1948, and 1953** aerial photographs, a basin is observed adjacent to Lot 3 in the future location of residential properties at West Avenue J-4. A dirt road along the trend of 13th Street West bisects Lot 3.

In the **1979** aerial photograph, any agricultural land use at Lot 3 and at the surrounding properties has ceased. The southern portion of Lot 3 is vacant land, however, residential complexes are under construction in the northwestern and northeastern portions of Lot 3 near Kingtree Avenue, and West Avenues J-2, J-3, and J-4. Antelope Valley Hospital has been constructed to the northwest of Lot 3, and a shopping center at the corner of West Avenue J and 15th Street West (north-northeast of Lot 3) has been

completed. The former Unocal #4295 gas station, located 1354 West Avenue J, is observed northwest of Lot 3. Residential properties have been constructed to the east, southeast, and south, Sunnydale Elementary School is observed to the southeast, and The Springs Apartments have been constructed to the west of Lot 3. Two water tanks are located west of West Avenue J-4.

In the **1981** aerial photograph, additional residential dwellings have been constructed or completed at West Avenues J-2, J-3, and J-4. No other significant changes are observed.

In the **1989** aerial photograph, additional structures associated with Antelope Valley Hospital have been constructed to the west of Lot 3, residential construction appears to have been completed at West Avenues J-2, J-3, and J-4, additional residential buildings have been added to The Springs Apartment to the west of Lot 3, and the Arroyo Plaza shopping center has been constructed to the southwest of Lot 3 at the corner of West Avenue J-8 and 15th Street West. Construction has begun on Centerpoint Business Park to the north of Lot 3. No other significant changes are observed.

In the **1994** aerial photograph, all residential and commercial building construction noted in the **1989** aerial photograph has been completed. No other significant changes are observed.

In the **2002** aerial photograph, additional structures associated with Antelope Valley Hospital (including Renaissance Imaging) have been constructed to the west of Lot 3, primarily southwest of West Avenue J-4. No other significant changes are observed.

In the **2005** aerial photograph, construction is underway at the Aurora Village II 55+ Senior Community, located south of Lot 3. No other significant changes are observed.

In the **2009** aerial photograph, construction has been completed on the AV Kidney Institute and the nearby vacant commercial building, located south of Lot 3 near the corner of West Avenue J-8 and 15th Street West. The residential buildings at West Avenues J-2 and J-3 have been demolished and their lots vacated. No other significant changes are observed.

In the **2010** aerial photograph, the former Unocal #4295 gas station, located 1354 West Avenue J, has been demolished and the land it occupied vacated, northwest of Lot 3. No other significant changes are observed.

In the **2012** aerial photograph, the current Rite Aid building has been completed northwest of Lot 3 at the former Unocal #4295 gas station location, at the corner of West Avenue J and 15th Street West. A residential building at the northeast portion of Lot 3 along Kingtree Avenue has been demolished and the lot it occupied has been vacated. No other significant changes are observed.

4.3.2 Historical Topographic Maps

Historical topographic maps provided in the EDR Historical Topographic Map Report were reviewed for information regarding past site uses, and include the following quadrangles for Lots 1, 2, and 3: Elizabeth Lake (1915 ad 1917), Oban (1930 and 1933), Lancaster (1930 and 1933) and Lancaster West (1958, 1974, and 2012). The listings below will contain two or more quadrangles where they were combined for complete site coverage. Copies of these maps are provided in Appendix E.

The following paragraphs are a chronological summary of the review for Lots 1, 2, and 3 of the site.

Lot 1

Elizabeth Lake 1915: No structures are depicted on Lot 1, however, unspecified structures are depicted to the southeast of Lot 1. Lot 1 appears to be vacant and undeveloped. West Avenues J and J-8 bound Lot 1 on its north and south sides, and 20th Street West is depicted to the west of Lot 1.

Elizabeth Lake 1917: No structures are depicted on Lot 1, however, unspecified structures are depicted to the southeast of Lot 1. Lot 1 appears to be vacant and undeveloped.

Lancaster and Oban 1930: No structures are depicted on Lot 1 and surrounding properties. West Avenue J is shown as Del Sur Road, and West Avenue J-8 is not mapped. Lot 1 and the surrounding properties appear to be vacant and undeveloped.

Lancaster and Oban 1933: No structures are depicted on Lot 1 and surrounding properties. The area appears to be vacant and undeveloped.

Lancaster West 1958: No structures are depicted on Lot 1. Antelope Valley Hospital and two water tanks are mapped to the east of Lot 1, and a few structures are depicted primarily to the north, east, and west of Lot 1. West Avenue J and 20th Street West are shown in the vicinity of Lot 1.

Lancaster West 1974: No structures are depicted on Lot 1. Antelope Valley Hospital construction has expanded as additional buildings have been mapped, a large warehouse-type building has been built directly west of the northwest portion of Lot 1, additional unspecified structures are mapped to the north and west of Lot 1, and residential buildings The Springs Apartment complex have been completed. West Avenue J-8 is mapped along the southern boundary of Lot 1, and a channelized waterway adjacent to California State Route 14 have been mapped at the southwest boundary of Lot 1.

Lancaster West 2012: No structures are depicted on Lot 1 or on the surrounding properties with the exception of the Antelope Valley Hospital to the east of Lot 1.

Lot 2

Elizabeth Lake 1915: An unspecified structure is depicted on Lot 2 near West Avenue J-8, and other unspecified structures are depicted in the vicinity of Lot 2.

Elizabeth Lake 1917: No changes to Lot 2 and the surrounding properties were mapped.

Lancaster and Oban 1930: Two unspecified structures are depicted on Lot 2 and others are mapped on the surrounding properties. Roads depicted on the Elizabeth Lake 1915 and 1917 quadrangles are not mapped.

Lancaster and Oban 1933: No changes to Lot 2 and the surrounding properties were mapped.

Lancaster West 1958: No structures are depicted on Lot 2. Antelope Valley Hospital and two water tanks are mapped to the north of Lot 2, and residential developments are depicted to the northeast and southeast. Sunnydale Elementary School is mapped to the northeast of Lot 2. 15th Street West is shown bounding the eastern limb of Lot 2.

Lancaster West 1974: No structures are depicted on Lot 2. Residential buildings at the The Springs Apartments complex have been completed. West Avenue J-8 is mapped along the northern boundary of Lot 2, and a channelized waterway adjacent to California State Route 14 have been mapped at the southwest boundary of Lot 2.

Lancaster West 2012: No structures are depicted on Lot 2 or on the surrounding properties.

Lot 3

Elizabeth Lake 1915: An unspecified structure is depicted at southeast corner of Lot 3, and other unspecified structures are depicted in the vicinity of Lot 3. West Avenues J and J-8 are mapped at the north and south boundaries of Lot 3.

Elizabeth Lake 1917: No changes to Lot 3 and the surrounding properties were mapped.

Lancaster and Oban 1930: One unspecified structure is depicted on Lot 3 at its southern end and others are mapped on surrounding properties. Roads depicted on the Elizabeth Lake 1915 and 1917 quadrangles are not mapped.

Lancaster and Oban 1933: No changes to Lot 3 and the surrounding properties were mapped.

Lancaster West 1958: Residential development is mapped along West Avenues J-2 and J-3 on Lot 3, and one structure is depicted on Lot 3 east of West Avenue J-4. Antelope Valley Hospital and two water tanks are mapped to the northwest and west of Lot 3, and residential developments are depicted to the north, east, and southeast. Sunnydale Elementary School is mapped to the southeast of Lot 3. 15th Street West is shown

bounding the western portion of Lot 3, and West Avenue J is mapped to the north.

Lancaster West 1974: Additional residential development is mapped in the northeastern portion of Lot 3 along Kingtree Avenue. Commercial structures are depicted to the north and northeast. Residential buildings at The Springs Apartments complex have been completed. West Avenue J-8 is mapped along the southern boundary of Lot 3, and a channelized waterway adjacent to California State Route 14 have been mapped to the west of Lot 3.

Lancaster West 2012: No structures are depicted on Lot 3 or on the surrounding properties.

4.3.3 Fire Insurance Maps

Fire insurance maps, or Sanborn[®] maps, are detailed city plans showing building footprints, construction details, use of structure, street address, etc. The maps were designed to assist fire insurance agents in determining the degree of hazard associated with a particular property. Sanborn Maps were produced from approximately 1867 to the present for commercial, industrial, and residential sections of approximately 12,000 cities and towns in the United States.

According to the report provided by EDR (Appendix E), there is no Sanborn Fire Insurance Map coverage for the site

4.3.4 Historical City Directories

City Directories have been published for cities and towns across the US since the 1700s. Originally a list of residents, the City Directory developed into a tool for locating individuals and businesses in particular. For each street address listed, the directory recorded the name of the resident or business that operated from this addresses. While City Directory coverage is usually comprehensive for major cities, it may be sporadic for rural areas and small towns. The purpose of the City Directory research was to attempt to assess the nature and type of businesses that were historically located at the site and adjacent addresses.

Leighton reviewed the EDR-City Directory Abstracts dated May 5, 2017 (Appendix E). Numerous listings for Lots 1, 2, and 3 were presented in the EDR-City Directory Abstract from 1971 to 2013 at varied yearly intervals. The following listings were found whose company names indicated possible use or handling of hazardous materials and/or petroleum products:

Lot 1

- 2003 – 44203 15th Street West – AV Engine

Lot 2

- 1999, 1995 – 43729 15th Street West – Goodyear Tire Center
- 2003 – 44203 15th Street West – AV Engine
- 2003 – 43759 15th Street West – Julie Renes Cleaning Service
- 2008 – 43729 15th Street West – Lancaster All Tune & Lube
- 2008, 2013 – 43750 15th Street West – Accurate Smog Center, Inc.
- 2008, 2013 – 43729 15th Street West – American Tire Depot
- 2013 – 2715 West Avenue J-8 – Premise Keepers Pest Solutions

Lot 3

- 2003 – 44203 15th Street West – AV Engine

Most of the above-listed business names appear associated with vehicle servicing; however, when mapped, they are located offsite and are primarily located to the south of Lot 2 and northwest of Lot 1. The remaining listings did not have company names that indicated use or handling of hazardous materials and/or petroleum products.

4.3.5 Building Department Records

Though buildings likely associated with historical agricultural land use were noted in our review of aerial photographs at the site (see Sections 4.3.1 and 4.3.2), historical structures were not identified in the response to our request from City of Lancaster, Building and Safety Division for building records pertaining to the site.

4.3.6 Other Historical Sources

Three sources were reviewed that provided detailed information pertaining to environmental background on two properties in the vicinity of the site, namely the former Unocal #4295 gas station located at 1354 West Avenue J (approximately 190 feet north of Lot 3), and Arco Station No. 1917, located at 1326 West Avenue K (approximately 0.38 miles southeast of Lot 2). A detailed description of the findings from our review is provided in Section 4.2.5.

Other historical sources were not reviewed as a part of this Phase I ESA.

4.3.7 Summary of Historical Land Use

Based on historical records, land use on all of the lots at the site is summarized as follows:

Approximate Time Period	Interpreted Site Land Use	Reference
Prior to 1928	Unknown	None Available
Approximately 1928 to 1953	Vacant, undeveloped land and agricultural land use	Aerial Photographs
1953 to 1979	Vacant, undeveloped land	Aerial Photographs
1979 to 2012	Vacant, undeveloped land, some residential development (Lot 3)	Aerial Photographs
2012 to present	Vacant, undeveloped land	Aerial Photographs

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

On May 12, 2017, Leighton personnel conducted a site reconnaissance on the site and surrounding area. The site reconnaissance consisted of observing and documenting existing conditions on the site and nature of the neighboring land uses. Photographs 1 through 28 of the site and surrounding area are presented in Appendix B and arrows indicating the direction of the photograph are noted on Figure 2.

5.2 General Property Setting

The multiple lots that comprise the site are vacant, undeveloped land covered mostly with weeds, grass, and shrubs. The site is located in an area surrounded by a variety of land use types including residential, commercial, and institutional. Particular features bounding the lots include a channelized waterway and the adjacent California State Route 14 bounding the southwestern side of Lot 1, Lot 2 is similarly bounded on its southwestern corner and is bounded by the channelized waterway on its south side, and Lots 1 and 3 are bounded on their respective east and west sides by the Antelope Valley Hospital campus (Figure 2).

5.3 Exterior and Interior Observations

5.3.1 Hazardous Substances, Drums, and Other Chemical Containers

Hazardous substances, drums, or other chemical containers were not observed on the site.

5.3.2 Storage Tanks

Evidence of underground storage tanks (USTs) (such as vent lines, fill or overfill ports, dispenser islands) and above-ground storage tanks (ASTs) was not observed on the site.

5.3.3 Polychlorinated Biphenyls (PCBs)

PCBs were once used as industrial chemicals whose high stability contributed to both their commercial usefulness and their long-term

deleterious environmental and health effects. PCBs can be present in coolants or lubricating oils used in older electrical transformers, hydraulic systems, and other similar equipment. In 1979, the USEPA generally prohibited the domestic use of PCBs in electrical capacitors, electrical transformers, vacuum pumps, hydraulic pumps, and gas turbines.

At Lot 1, a pole-top mounted electrical transformer was observed at the northwestern boundary of the lot along West Avenue J (Photo 1, Appendix B) and a pad-mounted electrical transformer was observed at the northeastern boundary of the lot near West Avenue J and adjacent to the Antelope Valley Hospital Outpatient Surgery Center (Photo 4, Appendix B; and Figure 2). At Lot 3, a pole-mounted transformer was observed in the northwestern portion of the lot near a residential complex along West Avenue J-3 (Photo 23, Appendix B). The transformers appeared to be in good condition and no staining was observed beneath or surrounding the transformers.

5.3.4 Waste Disposal

Evidence of waste disposal was not observed on the lots that comprise the site.

5.3.5 Dumping

Small piles of miscellaneous household and construction refuse, including clothes, asphalt, concrete, wood, cinder blocks, toys, and a small refrigerator, were observed on all three lots (Photos 5, 8, 10, and 11 for Lot 1, Photo 15 for Lot 2, and Photo 22 for Lot 3, Appendix B). No evidence of hazardous substances and/or petroleum products was observed.

5.3.6 Pits, Ponds, Lagoons, Septic Systems, Wastewater, Drains, Cisterns, and Sumps

No evidence of pits, ponds, lagoons, septic systems, wastewater, drains, cisterns, and sumps was observed on the site.

5.3.7 Pesticide Use

Evidence of pesticide use and storage was not observed on the site.

5.3.8 Staining, Discolored Soils, Corrosion

Stained or discolored soil and/or corrosion were not observed on the site.

5.3.9 Stressed Vegetation

Evidence of stressed vegetation was not observed on the site.

5.3.10 Unusual Odors

Unusual odors were not observed on the site.

5.3.11 Onsite Wells

Surface evidence of water, oil, or gas wells was not observed at the site.

5.3.12 Other Observations

A change in elevation due to possible imported fill placement and/or grading was observed on the eastern portion of Lot 2 in a rectangular area trending east-west and measuring approximately 250 feet by 850 feet in dimension (Photos 14 and 15, Appendix B).

6.0 INTERVIEWS

Interviews regarding the site were not conducted as the date of this Phase I ESA, but will be provided at a later date in an addendum letter or email once the interview form is received.

6.1 Interview with Owner

A Phase I ESA Owner interview form has not been completed as of the date of this Phase I ESA. The interview form will be provided as an addendum letter or email once it has been received by Leighton.

6.2 Interview with Property Manager

A Phase I ESA Owner Interview form has not been completed as of the date of this Phase I ESA. As mentioned above, the interview form will be provided as an addendum letter or email once it has been received by Leighton.

6.3 Interviews with Occupants

The site is currently vacant with no buildings and no interviews were conducted.

6.4 Interviews with Local Government Officials

Leighton did not interview employees with local government agencies to request information regarding historic and current uses of the site with the exception of the information noted in Section 4.2.

6.5 Interviews with Others

Leighton did not conduct additional interviews for this Phase I ESA.

7.0 FINDINGS

Leighton performed a Phase I ESA for three separate, vacant lots located northeast of the intersection of West Avenue J-8 and 20th Street West (“Lot 1”), southwest of the intersection of West Avenue J-8 and 15th Street West (“Lot 2”), and southeast of the intersection of West Avenue J-2 and 15th Street West (“Lot 3”) in Lancaster, Los Angeles County, California in accordance with Meridian’s authorization.

7.1 Onsite

The site was primarily vacant, undeveloped with some agricultural land use noted between 1928 and 1953. Between 1953 and 1979, agricultural land use ceased at the site and the site appeared as vacant undeveloped land. Between 1979 and 2012 in the northwestern and northeastern portions of Lot 3, residential development was observed. Following 2012, the residential developments at Lot 3 were demolished and all three lots were vacant and undeveloped. No building records were obtained from the City of Lancaster, Building and Safety Division regarding construction or demolition of the abovementioned buildings on Lot 3.

Currently, the site is vacant land partially covered with grass and brush. Small piles of miscellaneous household and construction refuse (including clothes, asphalt, concrete, wood, cinder blocks, toys, and a small refrigerator) were observed on all three lots. A rectangular area of soil at the eastern portion of Lot 2 measuring approximately 250 feet by 850 feet is elevated by comparison to the remainder of the lot, and soil piles were observed adjacent to the western toe of the elevated portion of the lot. This is an area where suspected imported fill placement and/or grading has occurred as of 1994 (Photos 14 and 15, Appendix B). No records or documentation were found pertaining to the source of the import fill and/or grading plans. The presence of imported fill is considered a REC as its origin is uncertain.

A search of selected government databases was conducted by Leighton using the EDR Radius Map Report environmental database report system. Details of the database search along with descriptions of each database researched are provided in the EDR Radius Map Report included in Appendix D. The report meets the government records search requirements of ASTM E1527-13 Standard Practice for Environmental Property Assessments: Phase I Environmental Property Assessment Process. The database listings were reviewed within the specified radii established by the ASTM E1527-13. The site

was listed in the EDR Radius Map Report as having 28.03 tons of asbestos-containing waste disposed at a landfill, and is interpreted to be associated with the demolition of the residential properties that existed between 1979 and 2012 in the northwest and northeast portions of Lot 3. Evidence of the former residential buildings located on Lot 3 was not observed during our site reconnaissance.

7.2 **Offsite**

Historically, the site was surrounded by a mixture of vacant, undeveloped and agricultural land. In approximately 1953, agricultural land use diminished followed by the gradual growth of residential, commercial, and institutional developments. Currently, the site is bordered by residential, commercial, and institutional land use as well as California State Route 14 on the southwestern sides of Lots 1 and 2.

A LUST Cleanup property listed as an “Open – Remediation” LUST property is located approximately 0.38 miles southeast of Lot 2 at 1326 Avenue K. This property is reported to have gasoline impact to groundwater due to a leaking UST. Groundwater beneath this property was measured on August 12, 2016 at depths ranging from 30.81 to 32.01 feet bgs, and the groundwater flow direction beneath this property was interpreted to be to the north-northwest.

A leak of an unknown quantity of chlorinated volatile organic compounds (VOCs) on January 2, 1965 was listed for Silver Hanger Dry Cleaners, located approximately 490 feet east of Lot 1. However, the cleanup status for the dry cleaner property is listed as “Completed – Case Closed” as of January 31, 2001.

A LUST Cleanup property is located approximately 190 feet north of Lot 3 at 1354 West Avenue J (at current Rite Aid location). A gasoline leak of unknown quantity was discovered on November 24, 1992, however, the property is listed as “Completed – Case Closed” as of September 7, 2012. Groundwater beneath this property was measured on May 7, 2012 at depths ranging from 60.95 and 61.65 feet bgs, and the groundwater flow direction beneath this property was interpreted to be to the north-northwest.

7.3 **Data Gaps**

The following data gaps were identified by Leighton:

- A User Questionnaire Form was not received from the client as of the date of this report. Should pertinent information be obtained from review of the User Questionnaire (if provided), an addendum letter or email will be provided by Leighton.
- An Owner/Site Contact Interview Form was not received from the client as of the date of this report. Should pertinent information be obtained from review of the Owner/Site Contact Interview Form (if provided), an addendum letter or email will be provided by Leighton.
- Response letters from Los Angeles County Public Health Investigations, the Lahontan Regional Water Quality Control Board, and the DTSC (Chatsworth) have not been received as of the date of this report. Should any documentation in the response letters from the abovementioned agencies contain pertinent environmental information for the site, an addendum letter or email will be provided by Leighton.
- Building records were not found for any of the APNs as a result of our records request from City of Lancaster Building and Safety Division, however, review of aerial photographs indicate that residential buildings were built on the northwestern and northeastern portions of Lot 3 by 1979, and demolished by 2012.
- Written information (such as analytical profiling) pertaining to the origin of imported fill and soil piles located on the eastern portion of Lot 2 was not found. The suspected imported fill is considered a REC.

Leighton will prepare an addendum letter or email should any received completed forms and/or responses from the above-listed agencies alter the conclusions and recommendations of this report.

It is Leighton's opinion that these data gaps will not significantly impact the conclusions and recommendations of this Phase I ESA.

8.0 OPINION

8.1 Onsite

Portions of the site were used for agricultural purposes until roughly 1953 and it is possible that organochlorine pesticides or herbicides may have been applied prior to this time. It is likely that any construction efforts for future development will involve grading and fill placement. The potential presence of organochloride pesticides and herbicides in the historical agricultural areas at the site is considered a REC. In the historical agricultural areas, representative soil sampling and analytical testing to assess for the presence of residual organochlorine pesticides or herbicides should be performed prior to the commencement of grading efforts.

Additionally, two areas of Lot 3 appeared to have residential development between the years 1979 to approximately 2012. The EDR records indicate the removal and landfill disposal as asbestos-containing waste totaling 28.03 tons was performed. The client should contact the seller to obtain definitive information regarding the circumstances surrounding generation of the asbestos-containing waste from the site as it relates to the potential demolition of these buildings.

Generally, imported fill should be profiled the potential presence of hazardous substances and/or petroleum products prior to placement on a site. Possible imported fill was observed on the eastern portion of Lot 2 in a rectangular area trending east-west and measuring approximately 250 feet by 850 feet in dimension. This change to the eastern portion of Lot 2 appears to have occurred as of 1994. Additionally, soil piles adjacent to the western toe of the suspected area of imported fill at Lot 2 were observed during the site reconnaissance. No records or documentation was found pertaining to imported fill or grading plans. Without records documenting the origin and/or environmental profile of the imported fill at the time of placement at Lot 2, we consider the suspected imported fill a REC. Representative sampling and analytical testing of the suspect fill material to evaluate for the presence of hazardous substances and/or petroleum products should be performed.

8.2 Offsite

We did not discover information to indicate the site has been affected by hazardous substances and or/petroleum products origination from offsite properties.

9.0 CONCLUSIONS AND RECOMMENDATIONS

Leighton has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 of site located northeast of the intersection of West Avenue J-8 and 20th Street West (“Lot 1”), southwest of the intersection of West Avenue J-8 and 15th Street West (“Lot 2”), and southeast of the intersection of West Avenue J-2 and 15th Street West (“Lot 3”) in Lancaster, Los Angeles County, California in accordance with Meridian’s authorization. Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, CRECs, or HRECs in connection with the site, except for the following RECs:

- **REC-1: Potential Presence of Organochlorine Pesticides and Herbicides:** The potential presence of organochloride pesticides and herbicides in the historical agricultural areas at the site is considered a REC. In the historical agricultural areas, representative soil sampling and analytical testing to assess for the presence of residual organochlorine pesticides or herbicides should be performed prior to the commencement of grading efforts.
- **REC-2: Suspected Imported Fill at eastern portion of Lot 2:** Records pertaining to the placement, environmental profiling, and/or origin of the suspected imported fill located on the eastern portion of Lot 2 were not found. The suspected imported fill area measures approximately 250 feet by 850 feet with a thickness of 6-7 feet. As a general practice, all imported fill should be environmentally profiled prior to placement at a site to ensure that imported fill containing hazardous substances and/or petroleum products have not been introduced to a site. Representative soil sampling and analytical testing should be performed to evaluate for the potential presence of hazardous substances and/or petroleum products in the fill.

In general, observations should be made during future property development for areas of possible contamination such as, but not limited to, the presence of underground facilities, buried debris, waste drums, and tanks, stained soil or odorous soils. Should such materials be encountered, further investigation and analysis may be necessary at that time.

10.0 DEVIATIONS

Leighton did not deviate from or alter the scope of work, as defined in Section 1.3 of this report. Although some data gaps are identified in Section 7.3 of this report, significant data gaps were not identified that affect the ability of Leighton to identify RECs at the site.

11.0 ADDITIONAL SERVICES

Leighton did not perform work outside the scope of work as defined in Section 1.3 of this report.

12.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

12.1 Corporate

Leighton is a California corporation, providing geotechnical and environmental consulting services throughout California. We are solely a consulting firm without interests in real property other than our office locations in Southern California. We provide professional environmental consulting services including application of science and engineering to environmental compliance, hazardous materials/waste assessment and cleanup, and management of hazardous, solid and industrial waste. Phase I Environmental Property Assessments are a part of this practice area and have been conducted by us.

12.2 Individual

The qualifications of the Project Geologist and the other Leighton environmental professionals involved in this Phase I ESA meet the Leighton corporate requirements for performing Phase I ESAs as specified by ASTM E1527-13. In addition, Mr. Wallace Sconiers, Jr. is a Professional Geologist (PG).

12.3 Environmental Professional Statement

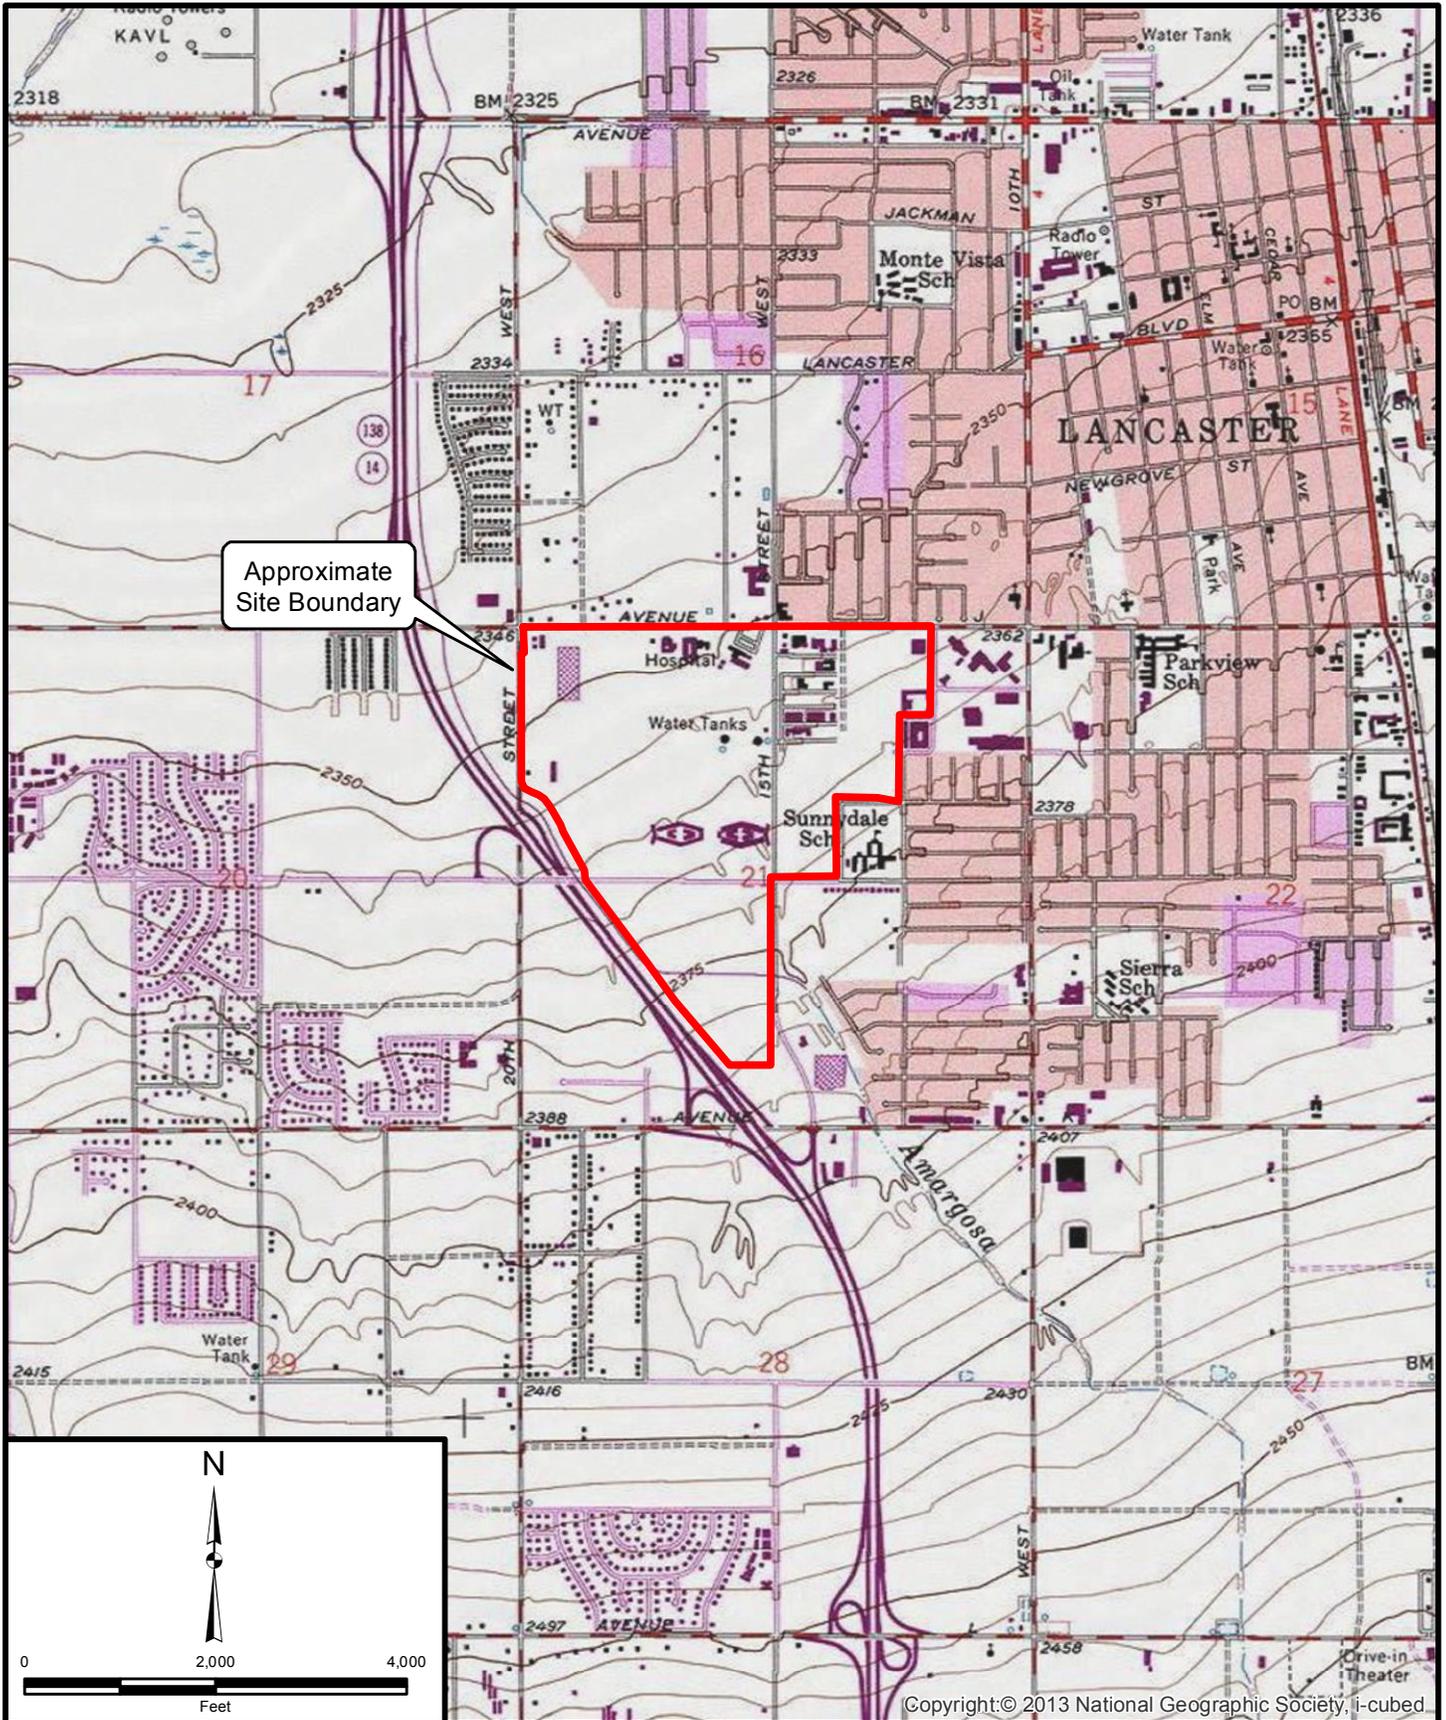

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional, as defined by §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Wallace Sconiers, Jr., PG
Project Geologist

APPENDIX C
INTERVIEW FORMS

(To be provided upon receipt from User and/or Owner.)

Leighton

Phase I ESA Owner/Site Contact Interview Form

Interviewee Name: Elizabeth Brubaker

Title: Director Housing

Address: 44933 Fern Avenue, Lancaster Ca. 93534 **Phone:** 661-723-5878

Relationship to Property: Property Owner

Name of Property Owner: City of Lancaster/Lancaster Housing Authority

Address of Property Owner: 44933 Fern Avenue, Lancaster Ca. 93534

Site Name: None

Property Address: None

Previous Street Names/Numbers: See Attached

General Business Type/Present Property Use: Vacant Land

Property Utilization during Ownership: Residential

Assessor Parcel #: See Attached

Grant Total Square Footage: N/A

Total # of Buildings: N/A

Date Built: N/A

Name and Address of Past Owners (include dates of ownership): N/A

Past Property Uses (include dates): Residential

Source of Potable Water Supply (municipal/groundwater wells): Los Angeles County Waterworks

Sewage Disposal (municipal/septic) (provide name of utility): City of Lancaster, Los Angeles County

Means of Heating/Cooling (gas, electric, heating oil, etc.): Electric and Gas

Fuel Source for Heating/Air Conditioning (provide name of utility): Electric

Neighboring Property Types (commercial/industrial/residential): Commercial and Residential

Current Uses of Adjoining Properties: **North:** Commercial

South: Residential

East: Vacant Land, Commercial, Residential

West: Hospital

ARE THERE NOW, OR HAVE THERE BEEN IN THE PAST, ANY OF THESE ITEMS ONSITE OR ON ADJACENT PROPERTIES:

ITEM	YES	NO	UNK	ADJACENT PROPERTY
• Hazardous Materials		✓		
• Hazardous Waste		✓		
• MSDS Sheets		✓		
• Underground Storage Tanks (USTs)		✓		
• Aboveground Storage Tanks (ASTs)		✓		
• Vent Pipes, fill pipes, or access ways indicating a fill pipe to an underground storage area		✓		
• Odors		✓		
• Drums		✓		
• Electrical or hydraulic equipment known to contain Polychlorinated Biphenyls (PCBs)		✓		
• Stained soil or surfaces		✓		
• Drains		✓		
• Sumps		✓		
• Clarifier		✓		
• Pits, ponds, or lagoons		✓		
• Stressed vegetation		✓		
• Areas for dumping solid waste (landfill)		✓		
• Wastewater		✓		
• Wells (groundwater, oil, and/or gas)		✓		
• Septic Systems		✓		
• Fill Material (if fill material is on site, please state source of fill)		✓		

ADDITIONAL QUESTIONS:	YES	NO	UNK	REMARKS
Has the Site been used as any of the following: gas station, motor repair facility, commercial printing facility, metal plating, dry cleaners, photo developing laboratory, junkyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility? If so, state which type of facility.		✓		
Are you aware of any Phase I or Phase II environmental site assessments, soil sampling reports, geotechnical or geologic reports, environmental compliance audit reports, environmental permits, registrations for USTs or ASTs, community right-to-know plans, environmental safety plans or reports regarding hazardous waste generation for the Site?		✓		
Do you know of any notices or correspondence from any government agency relating to past or current violations of environmental laws with respect to the Site or relating to environmental liens encumbering the Site?		✓		
Do you know of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site?		✓		
Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?		✓		
Do you know of any environmental concerns associated with the Site? If so please state in remarks column.		✓		
Do you know of any environmental concerns associated with any adjacent or nearby properties? If so please state in remarks column.		✓		

Additional Comments:

Preparer presents that to the best of the preparer's knowledge the above statements and facts are true and correct, and to the best of the preparer's actual knowledge no material facts have been suppressed or misstated.

Phase I ESA Users Questionnaire

Project Name: Independent & Assisted Living, Skilled Nursing & Memory Care

Complete and Correct Address(es) of the Property and APN(s):

See Attached

User Company Name:

Lancaster Housing Authority

User Name/Title:

Elizabeth Brubaker, Director of Housing

User Phone/Email: 661-723-5878

Interviewee Name and Relationship to Project:

Elizabeth Brubaker, Director of Housing, Property Owner

Site Owner: Lancaster Housing Authority

Reason Phase I is required:

Process of obtaining entitlements to construct project

Type of property:

Residential

Type of property transaction (e.g., Sale, purchase, exchange):

N/A

Any scope of services beyond the ASTM Practice E 1527:

N/A

All Parties that will rely on the Phase I report:

Antelope Valley Engineering

Name and Contact Information for Site Contact:

Elizabeth Brubaker

Any special terms or conditions:

None

Any other pertinent knowledge or experience with the property (e.g., prior reports, documents, correspondence concerning the environmental conditions of the property):

None

(1). Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? Yes | No

If Yes, Describe:

(2). Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? Yes | No

If Yes, Describe:

(3). Specialized knowledge or experience of the person seeking to qualify for the Landowners Liability Protections (LLP) (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the property or the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes | No

If Yes, Describe:

(4). Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 DRF 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? N/A

Yes | No

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Yes | No

If Yes, Describe:

(5). Commonly known or reasonable ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the property that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the property? Yes | No

(b.) Do you know of specific chemicals that are present or once were present at the property? Yes | No

(c.) Do you know of spills or other chemical releases that have taken place at the property? Yes | No

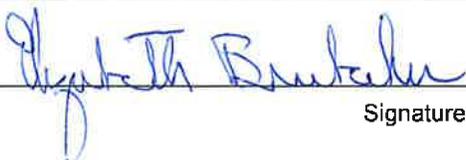

(d.) Do you know of any environmental cleanups that have taken place at the property? Yes | No

If Yes, Describe:

(6). The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*? Yes | No

If Yes, Describe:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tray
 Soil Surface Texture: sandy loam
 Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
 Soil Drainage Class: Moderately well drained
 Hydric Status: Partially hydric
 Corrosion Potential - Uncoated Steel: High
 Depth to Bedrock Min: > 0 inches
 Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9.6 Min: 8.5

EXECUTIVE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	7 inches	31 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 9.6 Min: 8.5
3	31 inches	70 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9.6 Min: 8.5

Soil Map ID: 2

Soil Component Name: Sunrise

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

EXECUTIVE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	18 inches	31 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 9 Min: 7.9

4	48 inches	64 inches	stratified gravelly sandy loam to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: Hesperia

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 6.1

EXECUTIVE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	3 inches	53 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
3	53 inches	77 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

Soil Map ID: 4

Soil Component Name: Cajon

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 6.6

EXECUTIVE SUMMARY

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RECORD SOURCES AND CURRENCY

To maintain currency of the following databases, EDR contacts the appropriate agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

ENVIRONMENTAL RECORDS

PRP: Potentially Responsible Parties

Standard Environmental Record Source: Other Records

Search Distance: Property

A listing of verified Potentially Responsible Parties

Date of Government Version: 10/25/2013

Source: EPA

Number of Days to Update: 3

Telephone: 202-564-6023

Last EDR Contact :04/25/2017

RMP: Risk Management Plans

Standard Environmental Record Source: Other Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 02/01/2017

Source: Environmental Protection Agency

Number of Days to Update: 57

Telephone: 202-564-8600

Last EDR Contact :04/21/2017

ALAMEDA CO. UST: Underground Tanks

Standard Environmental Record Source: State and tribal registered storage tank lists

Underground storage tank sites located in Alameda county.

Date of Government Version: 04/10/2017

Source: Alameda County Environmental Health Services

Number of Days to Update: 21

Telephone: 510-567-6700

Last EDR Contact :04/10/2017

AST: Aboveground Petroleum Storage Tank Facilities

Standard Environmental Record Source: State and tribal registered storage tank lists

Search Distance: Property

A listing of aboveground storage tank petroleum storage tank locations.

Date of Government Version: 07/06/2016

Source: California Environmental Protection Agency

Number of Days to Update: 69

Telephone: 916-327-5092

Last EDR Contact :03/24/2017

Alameda County CS: Contaminated Sites

Standard Environmental Record Source: State and tribal leaking storage tank lists

Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

Date of Government Version: 10/12/2016
Number of Days to Update: 35
Last EDR Contact :04/10/2017

Source: Alameda County Environmental Health Services
Telephone: 510-567-6700

BROWNFIELDS: Considered Brownfields Sites Listing

Standard Environmental Record Source: State and tribal Brownfields sites
Search Distance: 0.333 Mile

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 01/03/2017
Number of Days to Update: 57
Last EDR Contact :03/29/2017

Source: State Water Resources Control Board
Telephone: 916-323-7905

CA BOND EXP. PLAN: Bond Expenditure Plan

Standard Environmental Record Source: Other Records
Search Distance: 0.333 Mile

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989
Number of Days to Update: 6
Last EDR Contact :05/31/1994

Source: Department of Health Services
Telephone: 916-255-2118

CA FID UST: Facility Inventory Database

Standard Environmental Record Source: State and tribal registered storage tank lists
Search Distance: Property

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994
Number of Days to Update: 24
Last EDR Contact :12/28/1998

Source: California Environmental Protection Agency
Telephone: 916-341-5851

CA LA LF: City of Los Angeles Landfills

Standard Environmental Record Source: State and tribal landfill / solid waste disposal
Landfills owned and maintained by the City of Los Angeles.

Date of Government Version: 01/01/2016
Number of Days to Update: 56
Last EDR Contact :04/17/2017

Source: Engineering & Construction Division
Telephone: 213-473-7869

CDL: Clandestine Drug Labs

Standard Environmental Record Source: Other Records
Search Distance: Property

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 08/31/2016

Source: Department of Toxic Substances Control

RECORD SOURCES AND CURRENCY

Number of Days to Update: 34
Last EDR Contact :04/10/2017

Telephone: 916-255-6504

CHMIRS: California Hazardous Material Incident Report System

Standard Environmental Record Source: Other Records
Search Distance: Property

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 09/26/2016
Number of Days to Update: 83
Last EDR Contact :04/28/2017

Source: Office of Emergency Services
Telephone: 916-845-8400

CONTRA COSTA CO. SITE LIST: Site List

Standard Environmental Record Source: Other Records
Search Distance: 0.25 Mile

List includes sites from the underground tank, hazardous waste generator and business plan/2185 programs.

Date of Government Version: 11/17/2016
Number of Days to Update: 65
Last EDR Contact :05/01/2017

Source: Contra Costa Health Services Department
Telephone: 925-646-2286

CORTESE: "Cortese" Hazardous Waste & Substances Sites List

Standard Environmental Record Source: Other Records
Search Distance: 0.333 Mile

The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

Date of Government Version: 12/28/2016
Number of Days to Update: 64
Last EDR Contact :03/29/2017

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Records
Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS

Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Records

Search Distance: Property

RECORD SOURCES AND CURRENCY

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Records
Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

ABANDONED MINES: Abandoned Mines

Standard Environmental Record Source: Other Records
Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Records

Search Distance: Property

RECORD SOURCES AND CURRENCY

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

Standard Environmental Record Source: Other Records

Search Distance: Property

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Standard Environmental Record Source: Federal RCRA generators list

Search Distance: Property

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

Standard Environmental Record Source: Federal RCRA TSD facilities list

Search Distance: 0.333 Mile

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

Standard Environmental Record Source: Other Records

Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

SEMS: Superfund Enterprise Management System

Standard Environmental Record Source: Federal CERCLIS list

Search Distance: 0.333 Mile

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

Standard Environmental Record Source: Other Records

Search Distance: 0.333 Mile

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

UMTRA: Uranium Mill Tailings Sites

Standard Environmental Record Source: Other Records

Search Distance: 0.333 Mile

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Records

Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.125 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former Manufactured Gas Plants

Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: 08/28/2009

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

EXECUTIVE SUMMARY

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

CVS PHARMACY NO 9785	2006 W AVE J	NW 1/8 - 1/4 (0.156 mi.)	E16	30

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are

EXECUTIVE SUMMARY

3 ENVIROSTOR sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected

EXECUTIVE SUMMARY

listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

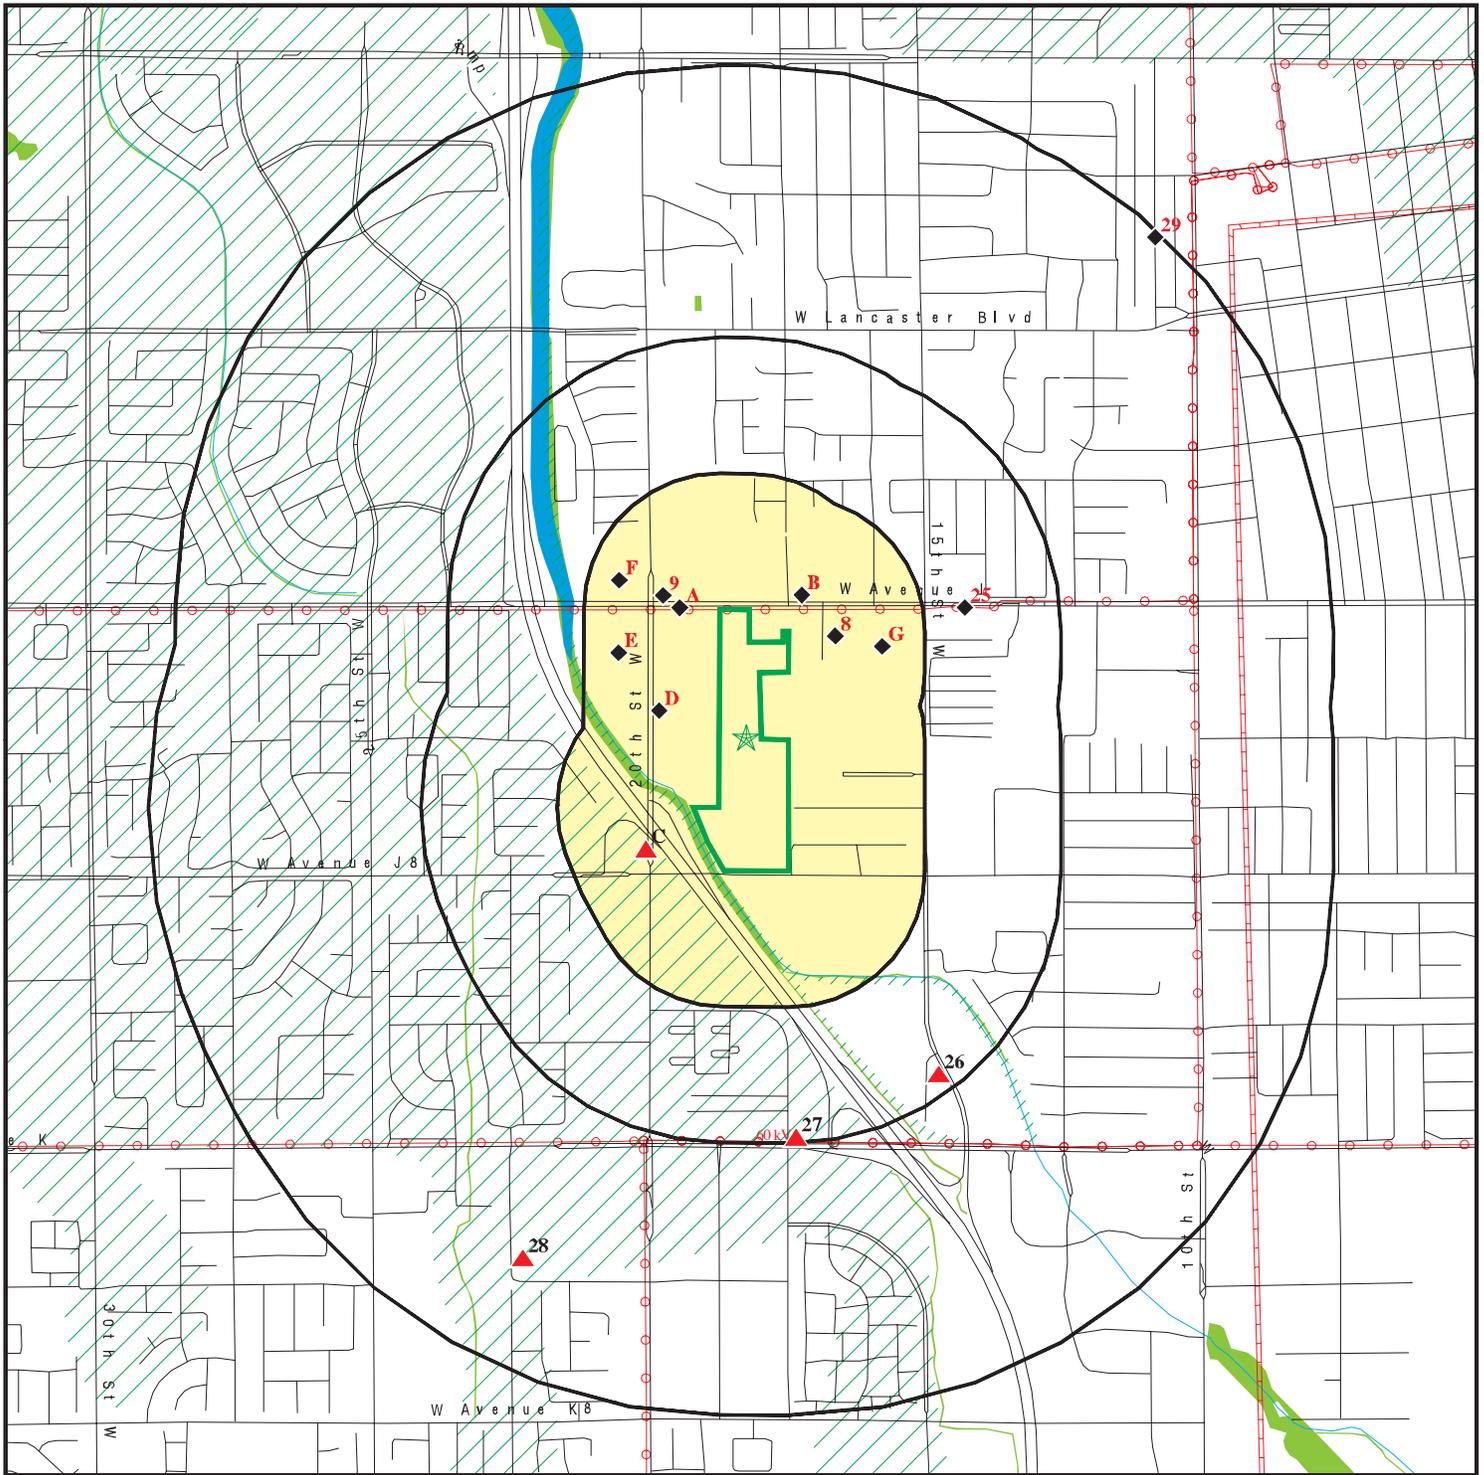

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
- Amount (Lbs): 1689

- Waste code: D002
- Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
- Amount (Lbs): 28

- Waste code: D005
- Waste name: BARIUM
- Amount (Lbs): 162

- Waste code: D007

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History: The Water Board closed this site in 1996 (see Water Board letter dated 8/2/1996). However, the County evidently keep the case open in their files and transferred this case to the Water Board in conjunction with the transfer of many of their open cases to the Water Board. I have reviewed the files, and determined there is no justification to reopen the case. This Water Board case was closed in 1996 and remains closed. Linda Stone, Water Board Case Manager December 2, 2010.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/05/2016	Source: EPA
Date Data Arrived at EDR: 01/05/2017	Telephone: N/A
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 04/21/2017
Number of Days to Update: 29	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Number of Days to Update: 92	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Number of Days to Update: 78	Next Scheduled EDR Contact: 07/31/2017
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

USGS TOPOGRAPHIC MAP

Target Property Map:	5630747 LANCASTER WEST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

06037C0410F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LANCASTER WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tray

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9.6 Min: 8.5
2	7 inches	31 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 9.6 Min: 8.5
3	31 inches	70 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9.6 Min: 8.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Sunrise

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	18 inches	31 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 9 Min: 7.9
3	31 inches	48 inches	cemented	Not reported	Not reported	Max: 0 Min: 0	Max: Min:
4	48 inches	64 inches	stratified gravelly sandy loam to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: Hesperia

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 6.1
2	3 inches	53 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
3	53 inches	77 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: Cajon

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 6.6
2	9 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

Soil Map ID: 5

Soil Component Name: Sunrise

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Cajon
 Soil Surface Texture: loamy sand
 Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
 Soil Drainage Class: Excessively drained
 Hydric Status: Partially hydric
 Corrosion Potential - Uncoated Steel: Moderate
 Depth to Bedrock Min: > 0 inches
 Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 6.6

EXECUTIVE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	9 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: Sunrise

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	18 inches	31 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 9 Min: 7.9

EXECUTIVE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
3	31 inches	48 inches	cemented	Not reported	Not reported	Max: 0 Min: 0	Max: Min:
4	48 inches	64 inches	stratified gravelly sandy loam to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: Tray

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Site History: The Water Board closed this site in 1996 (see Water Board letter dated 8/2/1996). However, the County evidently keep the case open in their files and transferred this case to the Water Board in conjunction with the transfer of many of their open cases to the Water Board. I have reviewed the files, and determined there is no justification to reopen the case. This Water Board case was closed in 1996 and remains closed. Linda Stone, Water Board Case Manager
 December 2, 2010.
