SOUTHERN CALIFORNIA EDISON "HIGH CONFIDENCE" PROJECT GUIDE

In order for Southern California Edison (SCE) to designate a project as "high confidence", applicants must submit the following items to Grid Interconnection & Contract Development. It is essential that project applicants obtain this designation as soon as possible so that interconnection to the SCE electric system is not delayed. Please contact SCE with any questions or to confirm these requirements.

	ITEMS
	Customer Project Information Sheet (CPIS)
	Single-Line
	Detailed Load Schedule
	Plot Plan
	CAD File (for SCE Designs) or Preliminary Map (for Applicant Designs)
	Design Option Letter

SCE's Distribution Resources Plan External Portal (DRPEP) provides mapped integration capacity, and can be found [here](#).
