RFQ 835-25

Renewable Hydrogen Upgrades to Power Generation, Energy Efficiency, and Emergency Resiliency for City Facilities

Addendum #2

Date: July 25, 2024

Questions:

1. Is the City willing to waive consultant minimum requirements 1, 2, and 9?
2. If the City is willing to waive the above requirements, can a 2-week extension be granted?
3. Can the City provide additional guidance/clarification on the cost proposal?
4. Can you please clarify what you require as a "curriculum sample"?
5. Are the required forms and copies of licenses excluded from the page count?
6. Given that the RFP was posted on 7/16 for a fairly critical scope to Lancaster Energy's hydrogen aspirations, can the due date of the proposal submittal be extended to 8/30 via addenda to proposal?
7. Can the minimum requirements #1 and #2 as pertaining to accreditation by NAESCO and DOE be completed past the due date for proposal?

Answers:

1. While meeting all the consultant requirements is preferred, we strongly encourage you to apply to this RFQ if you don't meet those requirements.
2. The final due date for this RFQ will be extended to August 13, 2024, 2:00 P.M.
3. We are seeking detailed cost estimates encompassing all phases of the project, including design, implementation, equipment procurement, and ongoing maintenance considerations. Please ensure your cost proposal outlines a clear breakdown of costs, including any anticipated expenses related to hydrogen infrastructure development and integration with existing systems.
4. Please disregard the phrase "curriculum sample." The phrase was not intended to be included in this RFQ.

5. The required forms and copies of licenses are excluded from the page count.
6. The final due date for this RFQ will be extended to August 13, 2024, 2:00 P.M.
7. As per answer 1, the City encourages all consultants to apply to this RFQ if you do not meet the minimum requirements.
